FOREWORD

The Air Force officer management survey was carried out under Project 7734, Development of Methods for Describing, Evaluating, and Structuring Air Force Occupations; Task 773401, Development of Methods for Collecting, Analyzing, and Reporting Information Describing Air Force Specialties.

Colonel Vasco E. Gulin and Mr. Nicholas A. Adams, Data Application Division, Data Services Center, Headquarters USAF, arranged for the administration of the survey instrument. Colonel John P. Lisack, Director, and Lieutenant Colonel Harold R. Decker, Deputy Technical Director, Air Force Educational Requirements Board Secretariat, and Dr. Kenneth Groves, Evaluation Services, Air University, developed the list of professional military education requirements topics and reviewed the management task statements.

The computer programs used in analyzing the inventory data were designed by Dr. Raymond E. Christal and were written by Computer Sciences Corporation, Houston, Texas, under Contracts No. AF 41(609)-1982 and AF 41(609)-2387.

This report has been reviewed and is approved.

John G. Dailey, Colonel, USAF
Commander

ABSTRACT

The main purpose of the officer management survey was to identify functions which all officers perform as distinct from work specific to a particular specialty and to determine the relationships of managerial responsibility to grade, career area, or other variables. A further aim was to obtain an evaluation of topics of professional military education requirements in terms of job performance or as contributory to an effective Air Force career. The world-wide survey sample consisted of 10,242 Air Force officers in grades second lieutenant through colonel. An officer management inventory was administered in 19 major commands using conventional sample survey procedures through the cooperation of the Data Application Division, Data Services Center, Headquarters USAF. In the subsequent analysis by means of the Personnel Research Division job-clustering program, management job types were not clearly differentiated. The extent of managerial responsibility, however, was shown to be directly related to grade. Field-grade officers performed, on the average, approximately four times as many managerial tasks as company-grade officers. Consolidated descriptions of management tasks performed were published for staff, field-grade, and company-grade officers in each of nine career areas. While some differences in emphasis were found, officers in the several career areas tended to allocate more or less the same percentage of their jobs to tasks falling in each of the management categories. Group difference descriptions were computed to highlight some of the major career ladder managerial differences. In evaluating 128 professional military education requirements topics, officers of all grades indicated a substantial need on the job for principles and techniques of leadership; oral and written communication; techniques of logical and of creative thinking; problem solving procedures; officer ethics; discipline and morale; military customs, courtesies, and ceremonies; and security of classified military documents and equipment.

SUMMARY

Morsch, Joseph E. *Survey of Air Force officer management activities and evaluation of professional military education requirements*. AFHRL-TR-69-38. Lackland AFB, Tex.: Personnel Research Division, Air Force Human Resources Laboratory, December 1969.

Problem

The main purpose of the officer management survey was to identify functions which all officers perform as distinct from work specific to a particular specialty and to determine the relationships of managerial responsibility to grade, career area, or other variables. A further aim was to obtain an evaluation of professional military education requirements in terms of job performance or as contributing to an effective Air Force career.

Approach

An officer management inventory was administered in 19 major air commands using conventional sample survey procedures through the cooperation of the Data Application Division, Data Services Center, Headquarters USAF. The survey instrument consisted of a background information section, a listing of 299 management tasks and military duties under 9 functional categories, and a list of 126 topics of professional military education. The inventory was completed by 10,242 Air Force officers in grades second lieutenant through colonel. On an 8-point scale, officers rated the extent to which each task is a part of their jobs. Then, again using 8-point scales, they rated each professional military education topic in terms of "need-on-job" and "need-to-know."

Responses to the task statements were analyzed by means of the Personnel Research Division job clustering program in order to identify managerial job types. Consolidated job descriptions were computed for each of the six grades of officers included in the survey. Group job descriptions were also published for staff, field-grade, and company-grade officers in each of nine career areas. Mean and standard deviations were computed for ratings of each professional military education topic as recorded by officers in each grade, and by staff, field-grade, and company-grade officers in each of the career areas.

Results

Forty-three managerial job types were identified but few of these could be clearly differentiated. For the most part the job types showed considerable similarity in the kinds of tasks performed but differed in the part of job allocated to the various duty categories.

The extent of managerial responsibility is directly related to officer grade. The higher the grade, the larger the percentage of the job devoted to commanding and directing tasks. On the other hand, tasks and duties assigned by special orders are inversely related to grade. Field-grade officers perform, on the average, approximately four times as many managerial tasks as company-grade officers. Officers in the Command and Management career area devote more of their job to management tasks than do members of any other area. Intelligence and Security staff officer jobs emphasize coordinating. However, officers in several career areas allocate more or less the same percentage of their jobs to each of the management categories under which tasks were listed.

Officers of all grades indicated a "substantial need on job" for topics concerned with leadership, communication, creative and logical thinking, problem solving, officer ethics, discipline and morale, military customs, and security. They reported a "substantial need to know" topics related to military organization, characteristics of leaders, administration and management, code of conduct, personal survival, and physical fitness.

Conclusions

1. It is extremely difficult to differentiate clearly significant managerial job types without knowledge of the context in which the management tasks are performed.
2. Managerial responsibility is directly related to grade.

3. Kinds of management cannot effectively be differentiated where managerial activities are stated in general terms.

4. Certain professional military education topics in present curricula appear to have little practical value to officers or officers have not been made aware of their usefulness.

5. Some professional military education topics are pertinent to particular career areas but are of only marginal importance to other areas.

This summary was prepared by J.E. Morsh, Occupational and Career Development Branch, Personnel Research Division, Air Force Human Resources Laboratory.

SURVEY OF AIR FORCE OFFICER MANAGEMENT ACTIVITIES AND EVALUATION OF PROFESSIONAL MILITARY EDUCATION REQUIREMENTS

I. INTRODUCTION

The rationale for surveying Air Force officer management activities is based on the fundamental concept that all officers perform many activities in common regardless of their fields of specialization. Most of these managerial functions, as distinct from work specific to particular specialties, may be classified into such categories as planning, organizing, controlling, evaluating, inspecting, directing, monitoring, supervising, implementing, and coordinating.

The purpose of this survey was to identify duties and tasks common to all officers; to identify tasks and duties performed by officers which are associated with grade, career area, or other variable; to determine allocation of time to various managerial and military duties and tasks; to obtain officers' ratings of the usefulness of certain professional military education subject matter in the actual performance of their jobs; and to obtain officers' ratings of the contribution of certain professional military education subject matter to the effective career of an Air Force officer even though the subject matter is not directly used on the job. It was anticipated that the results would (a) provide guidance for personnel planning and for determination of career management policy, particularly at Headquarters United States Air Force and major command level, (b) aid in the determination of educational requirements of officer specialties by the Air Force Educational Requirements Board, and (c) provide data for development of curricula for precommission schools, such as Officer Training School, Air Force Reserve Officers Training Corps, and the Air Force Academy.

In planning the officer management survey it was decided to follow essentially the same procedures used in surveying officer utilization fields and airman career ladders. This involved constructing an inventory composed of managerial duties and tasks that might be performed by an officer in any specialty, but in which tasks having reference to a specific specialty would be omitted. The inventory would be reviewed by senior officers acting as subject-matter specialists and would be administered in a field tryout and revised before being used in the survey proper.

II. DEVELOPMENT OF THE PRELIMINARY OFFICER MANAGEMENT INVENTORY

The preliminary form of the Officer Management Inventory was constructed in March 1961. Besides a Background Information section, the inventory consisted of 146 task statements grouped under eight duties: Planning, Directing, Supervising, Implementing, Coordinating, Evaluating, Communicating, and Performing. The following primary sources were used in developing the inventory:

1. Air Force Manual 36-1. *Officer Classification Manual*.
2. Command and Staff College Correspondence Course 3A Study Guides, Extension Course Institute, Air University Command, September 1960.
3. Hemphill, John K. *Dimensions of Executive Positions*. Columbus, Ohio: Ohio State University, 1950.
4. Mee, John F. (Ed.). *Personnel Handbook*. New York: Ronald Press, 1952.
5. Spriegel, William R. *Top Management Organization and Control*. Unpublished manuscript.
6. Zaccaria, Michael A., Driskill, Walter E., Ceely, Col. William D., and Tribble, Virginia A. *Minimum Essentials of Officer Education*. LMTC-OTA-60-3. Lackland Military Training Center, Air Training Command, 1960-62.
7. Miscellaneous textbooks, training course outlines, and other published materials.

The inventory was reviewed by 14 officers in the Personnel Laboratory (later designated Personnel Research Laboratory and currently Personnel Research Division) ranging in grade from second lieutenant through colonel and by 9 senior officers who were members of the Educational Requirements Board Professional Military Education Working Task Group.

At this stage the preliminary inventory was completely revised. The revision was based on review comments, officer course curricula, and management materials from civilian sources. The revised inventory which was assembled in July

1962 consisted of 233 task statements organized under 10 duty categories. The original Planning duty was separated into two duties, Planning and Organizing, and the Performing duty was divided into Performing Operational Functions and Performing Military Functions. The Background Information section was also revised to obtain data on organizational level and the number of persons commanded, directed, or supervised. Instructions for completing the inventory were modified and included as part of the inventory booklet.

III. PRELIMINARY SURVEY OF OFFICER MANAGEMENT ACTIVITIES

Copies of the revised Officer Management Job Inventory were mailed to Test Control Officers in seven major Air Force commands for distribution to a selected sample of officers. The commands included Air Defense Command, Air Force Logistics Command, Air Training Command, Military Airt Command, Tactical Air Command, and Strategic Air Command. The utilization fields represented were Operations (10-19), Scientific and Development Engineering (25-28), Electronics and Maintenance Engineering (55-57), Materiel (60, 63-66), Comptroller (67, 68), and Administration (70-75). Of the 204 inventories returned, 18 were completed by colonels, 35 by lieutenant colonels, 44 by majors, 36 by captains, 43 by first lieutenants, and 28 by second lieutenants.

The data obtained in the preliminary survey were analyzed in order to obtain an indication of results that might be expected in a more comprehensive survey. Consolidated managerial job descriptions were computed for each grade and printed out with the tasks in descending order of time spent on them. These descriptions showed the percentage of officers in each grade who performed each task, the average percentage of time spent on each task by officers in each grade who perform the task, the average percentage of time spent on each task by all officers in each grade, and the cumulative percentages of those last percentages.

The data were tabulated so that tasks performed and time spent on them by officers in the six grades could be readily compared. These tables indicated that certain management tasks are typical of each grade, while other tasks tend to be performed by all officers regardless of grade. For example, colonels in the preliminary survey typically perform such tasks as "Formulate plans for

operations two or more years in advance," "Manage a staff activity or agency," and "Assign priorities for programs or projects." Captains in the preliminary study more often perform such tasks as "Fix responsibility" and "Evaluate adequacy of facilities and equipment," while second lieutenants typically "Exercise direct supervision of work in a career area" and "Coordinate the implementation of directives." The preliminary survey indicated that such tasks as "Provide commander with technical advice, plans, or recommendations," "Schedule planning to meet requirements of an operational situation," and "Coordinate action required to resolve specific problems within an organization" are performed about equally as often by all officers regardless of rank.

The professional military education topics were rated in terms of their usefulness to an officer in the performance of his job. When rated by the 204 officers on a 9-point scale, the following topics received an average rating of 6 or above:

Oral Communication	7.5
Written Communication	7.2
Responsibility	7.0
Leadership	6.8
Briefing Techniques	6.3
Principles of Management	6.2
Authority and Delegation of Authority	6.1
Human Relations	6.0
Problem Solving Procedures	6.0

By way of contrast, the following topics received average ratings of less than 2 in terms of their usefulness in the performance of an officer's job:

Organization of Navy	1.9
Sino-Soviet Alliances	1.9
Unconventional Warfare Tactics	1.9
New Nations of Asia and Africa	1.8
Roles of Neutral Nations	1.8
Alliances and Pacts (General)	1.7
Geopolitical Theory	1.7
Targeting	1.7
Army Doctrine	1.6
Navy Doctrine	1.6
Chemistry	0.8

While not used in the performance of a specific job, knowledge of many of these topics would obviously be valuable to an officer. Consequently, provision was made in the revised inventory for rating each topic in terms of its usefulness in the performance of the job and also in terms of its contribution to the overall effectiveness of a career officer.

IV. DEVELOPMENT OF THE FINAL OFFICER MANAGEMENT INVENTORY

Recommendations made during joint conferences of Personnel Research Laboratory and Educational Requirements Board personnel held at Maxwell Air Force Base (18-20 September 1962) and at Lackland Air Force Base (8-9 January 1963) were considered in further revising the Officer Management Inventory. Modifications suggested by the Curriculum Committee of the Officer Training School were also incorporated.

The final Officer Management Inventory was arranged in three sections.¹ In order to facilitate responding and to reduce key-punching error, the items were pre-coded wherever possible. The first section required response to the following items of background information:

1. Air Force base or installation
2. Organization
3. Name or title of your job
4. Air Force Service Number
5. Primary AFSC
6. Duty AFSC
7. Total months in Duty AFSC
8. Total months in utilization field
9. Total hours per week you normally work
10. Of the above, how many hours per week do you normally spend working on additional duties and tasks?
11. How many years of active federal military service have you completed?
12. Your rating and flying status
13. Your present grade
14. Grade of your immediate supervisor
15. Your major field of study
16. Your education
17. Type of your present duty
18. Your major command
19. Level of your organization
20. Level of your unit or element within your organization
21. Management level of your assignment
22. Original source of commission

The second section was the job inventory proper. It consisted of 299 management tasks and military duties listed under 9 categories as follows:

Duty	Tasks
A. Commanding and Directing	35
B. Supervising	26
C. Planning	39
D. Organizing	14
E. Evaluating	36
F. Coordinating	26
G. Communicating	42
H. Implementing	17
I. Other Tasks and Military Duties	64

The officer incumbent was asked to rate each task statement by making a judgment concerning the extent to which the task is a part of his job. He was to base his judgment of each task upon its importance, the frequency with which he performs it, the time he spends on it, its critical nature with respect to job success, or any other relevant factor. Using a scale adapted from Hemphill (1960), the officer was directed to relate each task to his job as follows:

- | | |
|---|-------------------------------------|
| 0 Definitely not a part of my job; does not apply | 1 |
| 1 | 2 |
| 2 | 3 |
| 3 | 4 A substantial part of my job |
| 4 | 5 |
| 5 | 6 |
| 6 | 7 A most significant part of my job |

The third section of the inventory consisted of 126 topics of professional military education listed under 5 headings as follows:

Course Category	Topics
J. Military Strategy and Employment	20
K. National Security Policy and Strategy	13
L. International Relations and Economics	29
M. Management	42
N. Individual Skills and Knowledge	22

The officer incumbent was asked to rate each topic twice on a scale from 0 to 7. First he rated the extent to which he actually needed knowledge of the topic to perform his present duties. He then rated the extent to which any officer in the Air Force needs to know the topic for an effective career. The following rating scale was used for both ratings:

- | | |
|-----------|--------------------|
| 0 No need | 1 Minor need |
| 1 | 2 |
| 2 | 3 |
| 3 | 4 Substantial need |
| 4 | 5 |
| 5 | 6 |
| 6 | 7 Great need |

¹The survey instrument is available to qualified users upon request to Personnel Research Division (PAOA), Lackland Air Force Base, Texas 78236.

V. THE SURVEY SAMPLE

As originally planned, the sample to be used in the officer management survey was to consist of 2,000 Air Force officers selected from all utilization fields and all major commands. However, members of the Air Force Educational Requirements Board Secretariat were interested in obtaining data from a much larger sample, approximately ten percent of all officers in the Air Force. An attempt was made to insure statistical adequacy of the survey data by obtaining a stratified sample across the 49 utilization fields. For those fields with the largest populations, a 2, 3, or 5 percent sample was used. For fields with intermediate populations, 10, 20, or 30 percent samples were selected. For those fields with the smallest populations, a 50 percent sample was used. Within a utilization field, the sample was randomly selected by surveying officers with appropriate last digits in their service numbers. Data for final analysis were obtained from 10,242 Air Force officers in six grades as follows:

Colonel	1,145
Lieutenant Colonel	1,752
Major	3,686
Captain	2,025
First Lieutenant	1,221
Second Lieutenant	413

VI. THE WORLD-WIDE SURVEY

In order to administer a survey of the proposed magnitude, cooperation was sought from the Data Application Division, Data Services Center, Headquarters United States Air Force. Since it was agreed that the sample survey procedures of that agency would be used for administration of the inventory, several format and procedural changes were made. It was necessary to put the inventory in a format familiar to those who usually key punch Sample Survey data. The title on the cover sheet was changed to read "Management Education Requirements of Air Force Officers" in order more accurately to reflect the content of the inventory. The words "Headquarters USAF," the date 30 June 1964, and RCS number AF-P774(OT) also appeared on the cover. Master mats were then released to the appropriate commands who reproduced and distributed the inventories for completion by the desired sample of officers. The data were then key punched using command facilities, and the completed inventories and data card decks were sent to Air University. After running some preliminary distribution analyses,

Air University forwarded the inventory booklets and data card decks to the Personnel Research Laboratory. The following commands and organizations participated in the survey:

Headquarters United States Air Force
Headquarters Command
Air Force Accounting and Finance Center
Officer of Aerospace Research
Air University
United States Air Force Academy
Continental Air Command
Alaskan Air Command
United States Air Forces Southern Command
Air Defense Command
Air Training Command
Air Force Communications Service
Air Force Systems Command
Air Force Logistics Command
Strategic Air Command
Tactical Air Command
Military Air Transport Service
Pacific Air Force
United States Air Forces in Europe

VII. ANALYSIS OF OFFICER MANAGEMENT SURVEY

Preliminary analyses of the survey data were made by the Secretariat of the Air Force Educational Requirements Board early in 1965. These analyses consisted primarily of tabulations of responses to the professional military education section of the inventory which were of particular interest to the Board. Copies of the tabulations were distributed within Air University Command, Headquarters United States Air Force, the Air Force Academy, Air Training Command, and the Personnel Research Laboratory. It was thought that the tabulations would "provide invaluable information to persons responsible for planning the curriculums of pre-commissioning and professional military education programs."

VIII. OFFICER MANAGEMENT JOB TYPES

In initiating the present study, it was hypothesized that there probably were differences in the kinds of management activities performed by officers which would be reflected in officer management job types that could be identified by an automated job-clustering program. Since the survey sample of 10,308 cases was well beyond the 2,000-case limit of the computer job-clustering program, a stratified subsample of 1,873 cases was

selected. The subsample was chosen so as to insure at least 200 cases in each grade and, by random sampling within grade and DAFSC, representativeness of all utilization fields. It was found, however, that the clustering program generated a "snow-ball" effect. One comparatively large group was formed, and the smaller groups produced during later stages of the program were successively combined with the large group. There was no tendency to form significant identifiable clusters of job types usually found in other surveys. The entire sample also showed considerable homogeneity. The job description of all 1,873 cases could be used to describe the job of any individual member with an average accuracy of approximately 46 percent.

In an attempt to facilitate the identification of managerial job types, responses made on the 8-point rating scale, 0 through 7, were rescored so that all entries below 3 (that is, entries 0 through 2) were scored as 0. The job-clustering program was then reapplied. Forty-five cases with no entries of 3 or above dropped out of the analysis, leaving 1,828 cases to be grouped. The chief effect of using the 6-point rating scale instead of the original 8-point scale was to reduce the index of homogeneity. For example, the job description of the 1,828-case total sample described the job of any individual member with an accuracy of only about 26 percent instead of the 46 percent for the total sample found in the first grouping analysis. However, the snow-balling effect was not eliminated.

Forty-three managerial job types were identified by the clustering program. One of these, consisting of 281 members, tended to form a nucleus with which were combined the relatively small job types identified at later stages in the program. For the most part the job types showed considerable similarity in the kinds of tasks performed. The members of all but seven performed some tasks in every duty category. They differed in the distribution of time among the various duties. A few of the job types could be readily differentiated. For example, for members of three job types, 60, 62, and 66 percent of their jobs respectively was devoted to supervisory tasks, while 63 percent of the managerial activities of another job type was concerned with tasks and duties assigned by special orders. Commanding and directing tasks made up 50 and 59 percent respectively of two other job types, and evaluating tasks formed 53 percent of the managerial work of another job type. Communicating tasks constituted the major managerial part of two job types.

For the most part, however, it was found to be extremely difficult to differentiate clearly significant managerial job types out of context or without knowledge of the situation in which the management tasks were performed. On the basis of this survey, there was also no way of determining what proportion of a particular officer's job is made up of management tasks. For these reasons, it was decided to exclude officer management job type descriptions from the present report. Appropriate tasks, some of which were taken from the inventory used in the officer management survey, have been included in instruments used in subsequent surveys of officer utilization fields.

IX. SPECIAL JOB DESCRIPTIONS

Each job inventory completed according to the Air Force procedure is, in a sense, the description of an individual's job in that it specifies his work activities and shows how his time is distributed across the tasks listed. Thus each individual in an Air Force occupational survey generates a separate job description.

In most surveys using the Air Force method of occupational analysis, tasks are rated in terms of relative time spent. As a first step in the analysis, the computer converts each individual's relative time spent responses to percentages. All of an incumbent's time spent entries are summed. The total obtained is taken as contributing 100 percent of his job. Each entry is then divided by the total, and the quotient is multiplied by 100 to give a percentage of the job for each task. Any person performing one or more tasks in a duty is said to perform the duty. The percentage of the job spent by an incumbent in each duty is obtained by summing the percentages for all his tasks in that duty.

The computer has been programmed to generate composite job descriptions, made up of tasks performed, for any group of incumbents defined in terms of background variables. In the printout, the tasks are listed in descending order of the percentage of work time spent on them. Job descriptions are also published which show in descending order the percentage of time spent on duties.

In the present survey, tasks were rated in terms of part of the job instead of being rated on relative time spent. An earlier study had shown by means of a regression equation that the Hemphill part-of-the-position scale reflected a combination of importance, criticality, and time spent (Cragun &

McCormick, 1967). It was also reported that the scale had satisfactory reliability and was more favorably received by officer respondents than either importance or time spent scales.

The part-of-the-job ratings obtained in the present survey were analyzed by the computer in exactly the same way as the usual relative time spent ratings. In the printouts of the consolidated job descriptions, the designation "time spent" must be interpreted as "part of the job." An officer may have assigned a high rating to a task because he considered the task important or critical rather than more time-consuming than other tasks. It should be kept in mind also that "part of the job" refers to the managerial part of the officer's job only and not to his entire job.

Group job descriptions were computed for 31 special groups which included groupings by officer grade and career area.

X. GRADE GROUP JOB DESCRIPTIONS

In Appendix I appear the job descriptions for the six grades included in the survey of the Air Force officer management activities. The officer grade groups and the number included in each group are as follows:

Number	Grade Group	N
SPL001	Colonel	413
SPL002	Lieutenant Colonel	1,221
SPL003	Major	2,025
SPL004	Captain	3,686
SPL005	First Lieutenant	1,752
SPL006	Second Lieutenant	1,145

Each job description reported consists of two parts. The first part is a job description in terms of duties performed by the particular group, and the second is a job description based on tasks. The task job description printout contains the number of cases surveyed (10,308), the number of tasks in the inventory (299), the number of duties in the inventory (9), the number of members in the group, and the group identification (Colonel, Lieutenant Colonel, etc.).

Tasks are listed in descending order of percentage of job or of time spent on them by members of each group as follows:

1. Percentage of the members of the group who perform each task.
2. Average percentage of time spent on each task by those members of the group who perform the task.
3. Average percentage of time spent on each task by all members of the group.
4. Cumulative average percentage of time spent on tasks by all members of the group.

Each task description printout is preceded by a duty description. The duty description printout contains the same preliminary information that appears in the task job description. Duties are listed in descending order of percentage of job or of time spent on them in the same format as that used in the task description printout.

Table 1 summarizes for the six officer grade groups the number of management tasks making up 25, 50, 75, 90, and 100 percent of the management activities performed. Thus half of the managerial effort of second lieutenants is spent on 59 tasks. All 299 tasks in the inventory are performed by each of the officer grade groups.

One hundred eighty-one tasks are performed by a larger percentage of colonels than that of any other grade. Similarly, 59 tasks are performed by a larger percentage of lieutenant colonels, 21 tasks by a larger percentage of majors, 8 tasks by a larger percentage of captains, 17 tasks by a larger percentage of first lieutenants, and 13 tasks by a larger percentage of second lieutenants than that of any other grade.

Table 1. Number of Tasks Accounting for Management Activities by Officer Grade Group

Grade	Number of Tasks Accounting for Given Percentage of Management				
	25%	50%	75%	90%	100%
Colonel	30	74	134	186	299
Lt Colonel	31	77	139	195	299
Major	30	76	139	198	299
Captain	22	66	133	197	299
1st Lieutenant	23	67	135	201	299
2d Lieutenant	16	59	128	194	299

The extent of managerial responsibility is directly related to officer grade. This is shown by the number of management tasks performed by 50 percent or more members in each grade as follows:

Colonel	181
Lieutenant Colonel	171
Major	146
Captain	52
First Lieutenant	45
Second Lieutenant	24

There appears also a striking difference in homogeneity of management task performance between field-grade officers as compared with company-grade officers.

Table 2 presents a summary of the average percentage of management tasks performed in each

duty by officers in each grade. Duty A, Commanding and Directing, is directly related to grade; the higher the grade, the larger the percentage of job devoted to this duty. On the other hand, Duty I, Other Tasks and Duties (assigned by special orders), is inversely related to grade; the higher the grade, the smaller the percentage of job allocated to these activities. By comparing cell entries with entries in the column designated "Percentage of Tasks in Duty," it can be seen whether or not officers of a particular grade devote more or less time to a duty than would be expected if time were equally distributed across all duties. For example, Duty E, Evaluating, forms a larger part of the job of all officer groups than would be expected.

Table 2. Average Percentage of Management Tasks Performed in Each Duty by Grade

Duty	Nr. of Tasks in Duty	Percentage of Tasks in Duty	Average Percentage of Tasks Performed by Officer Group					
			Col	LtCol	Maj	Capt	1st Lt	2d Lt

XI. CAREER AREA JOB DESCRIPTIONS

Because of the large number of officer specialties surveyed, it was not feasible to compute composite specialty job descriptions nor utilization field job descriptions. Instead, specialties were grouped into nine career areas, and job descrip-

tions were published for staff, field-grade, and company-grade officers in each of the career areas.

The following list gives the title and number for the officer career area groups for whom job descriptions were computed:

Number	Group Title	N
SPL007	Command and Management Officer	261
SPL008	Pilot - Company Grade	749
SPL009	Pilot - Field Grade	156
SPL010	Air Operations - Company Grade	937
SPL011	Air Operations - Field Grade	228
SPL024	Air Operations - Staff	336
SPL012	Scientific - Company Grade	386
SPL013	Scientific - Field Grade	100
SPL025	Scientific - Staff	125
SPL014	Maintenance Engineer and Civil Engineer - Company Grade	636
SPL015	Maintenance Engineer and Civil Engineer - Field Grade	146
SPL026	Maintenance Engineer and Civil Engineer - Staff	344
SPL016	Material and Comptroller - Company Grade	558
SPL017	Material and Comptroller - Field Grade	117
SPL027	Material and Comptroller - Staff	326
SPL018	Administration and Support - Company Grade	564
SPL019	Administration and Support - Field Grade	115
SPL028	Administration and Support - Staff	313
SPL020	Intelligence and Security - Company Grade	508
SPL021	Intelligence and Security - Field Grade	72
SPL029	Intelligence and Security Staff	236
SPL022	Professional - Company Grade	1,262
SPL023	Professional - Field Grade	208
SPL030	Professional - Staff	285
SPL031	Officer Management - Total Sample	9,981

² Essentially the same conclusions were drawn from the results of several other analyses of the data. Group differences were computed; job descriptions were summarized task by task; and similarities among groups were analyzed. A brief explanation of the computer programs and the procedures for these analyses is given in Appendix II. The computer printouts of the data are not reproduced in this report; however, they are available to qualified requesters on a loan basis from the Personnel Research Division (PAOA), Lackland Air Force Base, Texas 78236.

Table 3 shows the average percentage of management tasks performed in each duty by staff, field-grade, and company-grade officer groups for nine career areas. Among staff officers, Duty A, Commanding and Directing, accounts for a larger percentage of management (20.47 percent) by Command and Management officers than that for any other career area group. On the other hand, Duty I, Other Tasks and Duties (assigned by special orders), form the least part (2.95 percent) of Command and Management officers' managerial activities. Intelligence and Security staff officers devote more time (12.06 percent) to Duty F, Coordinating, than do members of any other career field group.

As is evident from Table 3, field-grade pilots allocate a larger percentage of their job (19.02 percent) to Duty B, Supervising, than do officers in any other career area group. Field-grade professional officers devote a larger percentage (5.24 percent) of their jobs to Duty D, Organizing, than do officers in any other career area group. Scientific field-grade officers allocate a larger percentage of management tasks (21.14 percent) to Duty G, Communicating, than do members of any other career area group.

Among company-grade officers, pilots devote the largest percentage of management (22.04 percent) to Duty I, Other Tasks and Duties (assigned by special orders). Air Operations company-grade officers devote more management (6.67 percent) to Duty H, Implementing, than do other career area groups. Company-grade Scientific officers devote more management to Duty C, Planning (15.01 percent), and to Duty G, Communicating (24.99 percent), than do other career area groups. Materiel and Comptroller company-grade officers devote a larger percentage of their job (18.53 percent) to Duty E, Evaluating, than do any other career area groups.

While some of the highlights in Table 3 have been pointed out, the chief finding is that officers in the several career areas devote more or less the same percentage of their jobs to the various management activities as categorized under the different duties. Again, as mentioned earlier, it appears that kinds of management cannot be effectively differentiated when managerial activities are stated in general terms. In order to detect kinds of management, or differences in management among career areas, the context in which management is performed must be specified.²

Table 3. Average Percentage of Management Tasks Performed in Each Duty By Staff, Field-Grade, and Company-Grade Officers for Nine Career Areas^a

Duty	Nr. of Tasks	Percentage of Tasks in Duty	Average Percentage of Tasks Performed by Career Area

^aPilot career area is not applicable for staff officers; Command and Management career area is not applicable for field-grade and company-grade officers.

XII. PROFESSIONAL MILITARY EDUCATION REQUIREMENTS

In the last section of the inventory, officers were asked to rate a list of 128 professional military education topics on two 8-point scales to indicate the direct relevance of the topics to the job (i.e., need-on-the-job rating) and their more general relevance to overall professional enhancement (i.e., need-to-know rating). These topics had been selected with extreme care by panels of high-ranking officers working with the Air Force Educational Requirements Board. It was anticipated that officer ratings of the topics could be used as guidance in developing curricula for courses at Air University and other officer training units.

Table 4 shows the number of topics in each category with an average need-on-the-job and need-to-know rating of 4 ("substantial need") and above. In general, many topics concerned with management or with individual skills and knowledge received high ratings, while topics related to military strategy and employment, national security policy and strategy, and international relations and economics tended to receive low ratings.

In Table 5 in Appendix III, the mean ratings are given for each of the topics as recorded by 413 colonels, 1,221 lieutenant colonels, 2,025 majors, 3,686 captains, 1,752 first lieutenants, and 1,145 second lieutenants. All mean ratings of 4 or more indicating a "substantial need" have been printed in heavy type. Greatest need was expressed for certain topics concerning "Individual Skills and Knowledge" and "Management." The least need was shown for officer education in topics pertaining to "International Relations and Economics."

Officers of all grades indicated a "substantial need on the job" for the following 11 topics of professional military education:

- Principles of leadership
- Techniques of leadership
- Communication, oral
- Communication, written
- Techniques of logical thinking
- Techniques of creative thinking
- Problem solving procedures
- Officer ethics
- Discipline and morale
- Military customs, courtesies, and ceremonies
- Security of classified military documents and equipment

In addition to these topics, officers of all grades indicated a "substantial need to know" the following topics of professional military education:

- Principles of military organization
- Organization and functions of the U.S. Air Force
- How organizations at squadron, group, wing, and division levels function
- Principles and concepts of command
- Characteristics of leaders
- Role of the NCO
- Personnel administration and management
- Conference and committee techniques
- Code of conduct
- Personal survival under emergency conditions
- Physical fitness as related to unit effectiveness

The distribution of topic ratings shown in Table 5 is intended to show differences among grades regardless of career area. In Table 6 in Appendix III, average ratings of topics are given for officers in nine career areas. It will be seen that there is considerable agreement among company-grade, field-grade, and staff officers within career area, but some differences appear in the way topics are rated by officers in different career areas.

Fourteen topics received unanimous average need-to-know ratings of 4 or more ("substantial need") by staff, field-grade, or company-grade officers regardless of career area. These topics were as follows:

- Principles of leadership
- Techniques of leadership
- Characteristics of leaders
- Role of the NCO
- Communication, oral (e.g., briefing, critiquing)
- Communication, written (e.g., correspondence, reports, staff studies, plans)
- Techniques of logical thinking
- Techniques of creative thinking
- Conference and committee techniques
- Problem solving procedures
- Officer ethics
- Discipline and morale
- Military customs, courtesies, and ceremonies
- Code of conduct

Table 4. Number of Topics in Each Subject-Matter Category with Need-on-the-Job (noj) and Need-to-Know (ntk) Mean Ratings of 4 or More, Shown by Career Area Groups
(Ratings of 4 or more indicate "Substantial Need")

Career Area Group	Number of Topics in Category Rated 4 or More									
	Military Strategy and Employment (20 Topics)		National Security Policy & Strategy (13 Topics)		International Relations and Economics (29 Topics)		Management (42 Topics)		Individual Skills and Knowledge (22 Topics)

Scientific - Staff	1	6	0	0	0	0	2	9	10	12
Maintenance Engineer and Civil										
Engineer - Company Grade	0	5	0	3	0	2	4	17	9	18
Maintenance Engineer and Civil										
Engineer - Field Grade	0	0	0	0	0	0	4	13	11	15
Maintenance Engineer and Civil										
Engineer - Staff	0	3	0	2	0	0	7	18	11	17
Materiel and Comptroller -										
Company Grade	0	0	0	2	0	3	4	12	8	16
Materiel and Comptroller - Field Grade	0	0	0	0	0	0	7	13	11	11
Materiel and Comptroller - Staff	0	1	0	0	0	0	7	18	11	13
Administration and Support -										
Company Grade	0	4	0	5	0	5	8	14	10	17
Administration and Support - Field Grade	0	2	0	4	0	2	10	14	12	16
Administration and Support - Staff	0	6	0	4	0	2	8	16	11	15
Intelligence and Security - Company Grade	0	3	2	4	0	6	5	9	10	16
Intelligence and Security - Field Grade	3	6	2	3	2	4	4	9	10	14
Intelligence and Security - Staff	1	5	2	3	0	1	5	10	11	14
Professional - Company Grade	0	0	0	0	0	0	0	4	7	14
Professional - Field Grade	0	0	0	0	0	0	4	7	10	14
Professional - Staff	0	0	0	0	0	1	5	12	13	18

In addition the following topics received almost unanimous need-to-know ratings of 4 or more:

- Principles of military organization
- Organization and functions of the U.S. Air Force
- Security of classified military documents and equipment
- Personal survival under emergency conditions

On the other hand, of the 126 topics presented, 54 failed to achieve an average need-on-the-job or need-to-know rating of 4 by staff, field-grade, or company-grade officers for any career area. Forty of these low-rated topics were included in the "International Relations and Economics" and "Management" categories. Either many of these topics are of little practical value to officers, or officers have not been made aware of their importance.

Certain topics are pertinent to particular career areas but are of only marginal importance in other areas. For example, company-grade, field-grade, and staff officers in the Intelligence and Security career area indicate substantial need on the job for "National security policy," "Sino-Soviet Bloc threat and Free World vulnerability," and "How the intelligence system operates." However, officers in no other career area report significant need on the job for these topics. Similarly, company-grade, field-grade, and staff Administration and Support officers report a substantial need on the job for "Principles of military organization" and "Organization and functions of the U.S. Air Force." This degree of need is not shown by officers in other career areas.

APPENDIX II. FURTHER ANALYSES OF OFFICER MANAGEMENT SURVEY DATA

Three additional kinds of analyses were computed in the present study: a group difference analysis, a summary of job description data by task, and a group similarity analysis. The computer programs and the kinds of information produced by these programs are explained briefly. Although the printouts are not presented in this report, the data are available for loan to qualified users upon request to the Personnel Research Division (PAOA), Lackland Air Force Base, Texas 78236.

Group Difference Analysis

A computer program has been devised to compute differences, in terms of members performing and in terms of average percentage of time spent on each task, between any two groups defined by background variables or identified as job types. All tasks in the inventory are ordered according to the magnitude of the differences in the percentage of members performing between the two groups compared. The table begins with the greatest positive difference, proceeds through zero difference, and ends with the greatest negative difference. In the printout, the two groups being compared are designated by group identification numbers and by group titles. The number of members in each group is also given. In this study, for example, the following information appeared in the group difference table designated GPDIF1:

SPL001 MEMBERS = 413 OFFICERS IN GRADE OF COLONEL

SPL002 MEMBERS = 1221 OFFICERS IN GRADE OF LT COLONEL

In the difference descriptions, six columns of numerical data provide information with respect to the two groups being compared. For example:

1. SPL002 PERCENT MEMBERS PERFORMING
2. SPL002 AVERAGE PERCENT TIME BY ALL GROUP MEMBERS
3. SPL001 PERCENT MEMBERS PERFORMING
4. SPL001 AVERAGE PERCENT TIME BY ALL GROUP MEMBERS
5. PERCENT MEMBERS PERFORMING - DIFFERENCE, SPL001 MINUS SPL002
6. AVERAGE PERCENT TIME BY ALL GROUP MEMBERS - SPL001 MINUS SPL002

In these analyses, "percent time" in items 2, 4, and 6 are interpreted as "part of the job."

If a greater percentage of colonels (SPL001) than of lieutenant colonels (SPL002) performs a task, the value in Column 5 will be positive. Similarly, if a greater percentage of lieutenant colonels than of colonels performs a task, then the value in Column 5 will be negative. The tasks are arranged in descending order of magnitude of the entries in Column 5 beginning with the highest positive value.

In the present study, ten group difference descriptions were computed. Five of these showed differences between officer grade groups, and five dealt with differences between certain career area groups where it was anticipated that the differences would be greatest. The difference descriptions which were computed compared the following groups:

- GPDIF 1: SPL001, Officers in grade of Colonel, vs. SPL002, Officers in grade of Lieutenant Colonel
- GPDIF 2: SPL002, Officers in grade of Lieutenant Colonel, vs. SPL003, Officers in grade of Major
- GPDIF 3: SPL003, Officers in grade of Major, vs. SPL004, Officers in grade of Captain
- GPDIF 4: SPL004, Officers in grade of Captain, vs. SPL005, Officers in grade of First Lieutenant
- GPDIF 5: SPL005, Officers in grade of First Lieutenant, vs. SPL006, Officers in grade of Second Lieutenant
- GPDIF 6: SPL008, Pilot - Company Grade, vs. SPL016, Materiel and Comptroller - Company Grade
- GPDIF 7: SPL010, Air Operations - Company Grade, vs. SPL012, Scientific - Company Grade
- GPDIF 8: SPL007, Command and Management - Field Grade, vs. SPL021, Intelligence and Security - Field Grade
- GPDIF 9: SPL009, Pilot - Field Grade, vs. SPL013, Scientific - Field Grade
- GPDIF 10: SPL028, Administration and Support - Staff, vs. SPL029, Intelligence and Security - Staff

Consolidation of Group Information by Task

A computer program has been developed which summarizes job description data task by task. Tasks are listed in inventory order showing the percentage of the members of a group who perform each task. The group may be the entire sample surveyed or any job type or subgroup specified. In order to facilitate comparison, as many as 12 groups may be shown in the same table.

Three group summary tables were computed in this study to show the percentage of group members performing each task. The first of these tables, GPSUM2, included the officer grade groups and the total sample, as follows:

- SPL001 Colonel
- SPL002 Lieutenant Colonel
- SPL003 Major
- SPL004 Captain
- SPL005 First Lieutenant
- SPL006 Second Lieutenant
- SPL031 Officer Management Inventory - Total Sample

The second group summary table, GPSUM3, showed percentages of members of 12 career area groups who perform each task. The following career area groups were included:

- SPL007 Command and Management officers
- SPL008 Pilot - Company Grade
- SPL009 Pilot - Field Grade
- SPL010 Air Operations - Company Grade
- SPL011 Air Operations - Field Grade
- SPL024 Air Operations - Staff
- SPL012 Scientific - Company Grade
- SPL013 Scientific - Field Grade
- SPL025 Scientific - Staff
- SPL014 Maintenance Engineer and Civil Engineer - Company Grade
- SPL015 Maintenance Engineer and Civil Engineer - Field Grade
- SPL026 Maintenance Engineer and Civil Engineer - Staff

The third group summary table, GPSUM4, presented percentages of members of 12 additional career area groups who perform each task. The following career area groups were included:

- SPL016 Materiel and Comptroller - Company Grade
- SPL017 Materiel and Comptroller - Field Grade
- SPL027 Materiel and Comptroller - Staff
- SPL018 Administration and Support - Company Grade
- SPL019 Administration and Support - Field Grade
- SPL028 Administration and Support - Staff
- SPL020 Intelligence and Security - Company Grade
- SPL021 Intelligence and Security - Field Grade
- SPL029 Intelligence and Security - Staff
- SPL022 Professional - Company Grade
- SPL023 Professional - Field Grade
- SPL030 Professional - Staff

Group Similarity Analysis

A computer program has been written which computes and reports a matrix of similarities among all groups identified in an analysis. This output provides a condensed picture of the interrelationships among groups. In the present study, a matrix was computed which presented all of the special groups reported.

13. ABSTRACT <p>The main purpose of the officer management survey was to identify functions which all officers perform as distinct from work specific to a particular specialty and to determine the relationships of managerial responsibility to grade, career area, or other variables. A further aim was to obtain an evaluation of topics of professional military education requirements in terms of job performance or as contributory to an effective Air Force career. The world-wide survey sample consisted of 10,242 Air Force officers in grades second lieutenant through colonel. An officer management inventory was administered in 19 major commands using conventional sample survey procedures through the cooperation of the Data Application Division, Data Services Center, Headquarters USAF. In the subsequent analysis by means of the Personnel Research Division job-clustering program, management job types were not clearly differentiated. The extent of managerial responsibility, however, was shown to be directly related to grade. Field-grade officers performed, on the average, approximately four times as many managerial tasks as company-grade officers. Consolidated descriptions of management tasks performed were published for staff, field-grade, and company-grade officers in each of nine career areas. While some differences in emphasis were found, officers in the several career areas tended to allocate more or less the same percentage of their jobs to tasks falling in each of the management categories. Group difference descriptions were computed to highlight some of the major career ladder managerial differences. In evaluating 128 professional military education requirements topics, officers of all grades indicated a substantial need on the job for principles and techniques of leadership; oral and written communication; techniques of logical and of creative thinking; problem solving procedures; officer ethics; discipline and morale; military customs, courtesies, and ceremonics; and security of classified military documents and equipment.</p>
